

Earth Care's Earth-Friendly, High-Quality Rain-Barrel Order Form

Thank you for considering ordering an Earth Care rain barrel. We've worked hard to develop an attractive, high-quality, low-cost barrel to serve you well. Please feel free to email us at info@EarthCareIndiana.org with questions. To order your rain barrel, please fill out the form below and send it along with your check made out to "Earth Care" to 1228 E. Maxwell Lane, Bloomington, IN 47401. We will use the information solely to fill your order, to let you know when the barrel is ready, or to return your check. We can fill prepaid orders only.

We will cash your check when we have 20 orders. Should we not receive 20 orders within 12 weeks, we will let you how many orders we have and you may ask us either to return your check or wait until we have the remaining orders. Please email us at info@EarthCareIndiana.org at any time with questions about your order.

Thank you for supporting our efforts to bring Hoosiers of faith together to help curb climate change. Proceeds from this project will help support the "What are we waiting for? Task of the Month Program" for congregations across Indiana. This program helps Hoosiers significantly reduce their energy usage. Please visit our website at www.earthcareindiana.org for more information. We'd welcome your involvement with Earth Care. *Your donation to support this work would also be greatly appreciated.*

Name _____ Email address _____

Donation to Earth Care			
TOTAL COST			
Please add me to Earth Care's e- newsletter list – I'll receive at most 15 emails a year.			Yes _____

* When your barrel fills in a heavy rain, excess water flows out the *overflow* so that it does not overflow randomly from the top. As you face your barrel, water enters it from the back and the spigot is in the front. Do you want your overflow in the front, to your left (as in the photo on the reverse side of this order form), or to your right?
